Object : Request for regulatory related information

Dear Customer,

Honeywell supports the general objectives of all global environmental government regulations that seek to ensure a high level of protection of human health and the environment from the risks that can be posed by chemicals, the promotion of alternative test methods, and the enhancement of competitiveness and innovation.

According to California EPA's Office of Environmental Health Hazard Assessment (OEHHA): The California Safe Drinking Water and Toxic Enforcement Act of 1986 (as in effect as of the date of this letter, "Proposition 65") requires the State to publish a list of chemicals known to cause cancer or birth defects or other reproductive harm. This list contains a wide range of naturally occurring and synthetic chemicals that are known to cause cancer or birth defects or other reproductive harm, additives or ingredients in pesticides, common household products, food, drugs, dyes, or solvents, chemicals used in manufacturing and construction, and byproducts of chemical processes, such as motor vehicle exhaust.

Proposition 65 generally requires that companies provide a "clear and reasonable" warning before knowingly and intentionally exposing consumers to a listed chemical. This warning can be given by a variety of means, including by labelling a consumer product.

As part of our ongoing commitment to compliance with applicable laws, we have implemented processes seeking to identify which, if any, of the products we supply to you require a warning label.

Based on the results of those processes, we hereby confirm that, to the best of our knowledge as of the date hereof, the products that we currently supply to you do not require product labelling in accordance with Section 25249.6 of the Act.
