

23 July 2018

California Proposition 65 - The Safe Drinking Water and Toxic Enforcement Act of 1986 Declaration

Dear Valued Customers,

The purpose of this document is to inform revisions to the California Proposition 65 warning regulations which come into effect on 30 August 2018.

Warning requirements are not limited to consumer products, but the method of warning transmission is different for consumer, environmental, and occupational exposures.

All Kester products are labeled for industrial use only and are defined as occupational-only use products under Proposition 65 regulation. Thus, the new long-form or short-form warnings are not required on Kester product labels, but Kester is still obligated to inform relevant California customers via safety data sheet (SDS) or other means. Besides SDS, this document lists all Kester products which contain Proposition 65 materials and the toxicity categories per the regulation as means to communicate. Kester will not be maintaining Proposition 65 warnings on product labels.

Although exempt, one exception will continue to be lead (Pb) containing products for which Kester will continue to include Proposition 65 long-form or short-form warnings on product labels. Kester will implement the new required warning text by 30 August 2018 for relevant lead (Pb) containing products.

Sell-through is allowed for products manufactured prior to 30 August 2018 that carry the old Proposition 65 warning text.

Bar Solder, Wire Solder, Solder Paste Products, Solder Preforms, Solder Ribbon.

For products which contain Pb, Kester is converting to the following short-form or long-form warning label information:

WARNING: Cancer. Reproductive Harm. - www.P65Warnings.ca.gov.

WARNING: This product can expose you to chemicals including LEAD, which is known to the State of California to cause cancer, and to cause birth defects or other reproductive harm. For more information go to www.P65Warnings.ca.gov.

The revised warning requirements include:

- Warning changed from “contains” to “can expose”
- Addition of ANSI-type warning symbol 
- Must name at least one Prop 65 chemical per end point
- Include URL for California agency Prop 65 web site: www.P65Warnings.ca.gov.

A product-specific warning via electronic device or process that automatically provides the warning prior to or during purchase will be required under the regulation for distribution partners using web sites with on-line ordering. Kester recommends such distribution partners to include the Prop 65 warning by posting directly or an SDS linked to the product page.

California end-users of Kester products, which contain Prop 65 chemicals, have a responsibility under the regulation to inform its employees of the hazard. *“No person in the course of doing business shall knowingly and intentionally expose any individual to a chemical known to the state to cause cancer or reproductive toxicity without first giving clear and reasonable warning to such individual.”* Such warning should be prominently and conspicuously displayed, such as a product-specific warning on a posted sign, shelf tag, shelf sign, or on the product itself.

Regards,

Stephen Santangelo
