

This is suitable for open reservoirs and turbulent water and industrial wastewater. The switching element is self cleaning with 10 Amp contacts, and makes the complete switch insensitive to humidity and condensation, caused by wide temperature fluctuations. The switch is fitted with additional internal weight, such that it brings the centre of gravity and rotation close to the cable entry.

- **Operates in Turbulent Fluids**
- **Unaffected by Suspended Solids**
- **WRAS approved**
- **Cable Mounting**
- **100m Depth Capability**
