

The First BNC Female / Female "Isolated" Panel Connector Rated for High Definition

This BNC connector was designed from the contact up to meet the rigid standards for HDTV. Bomar is the first to develop a panel connector of this type to perform as well at frequencies from 100MHz to 3.2 GHz. It is panel isolated and has a black nickel plated threaded bushing and flange. This attractive black metal flange identifies the connector as one of the *Shadow*™ HBC series HD connectors.
