

## *A Partner Dedicated to Your Success*

CUI Devices is an electronic components manufacturer specializing in an ever-expanding range of product technologies. With a mission to provide OEMs with a collaborative design experience, we're here to help customers achieve their design goals on time and on budget. Our suite of online resources and knowledgeable staff are ready to help.

### AUDIO

Our diverse range of compact buzzers, speakers, and microphones minimizes footprints and maximizes reliability.

### INTERCONNECT

Comprised of connectors and cable assemblies, our interconnect line has the variety of options for any application.

### MOTION

Highlighted by our AMT encoder series, our rotary encoders and stepper servo motors deliver accurate and rugged performance.

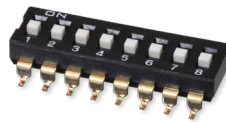

### SENSORS

Our open loop, hall effect current sensors measure currents from 0.3 to 60 A in compact, through hole mount packages.

### SWITCHES

Our DIP switches offer several pitch, pole count, and mounting options to help designers find the right switch for their application.

### THERMAL MANAGEMENT

Keep your system running at its peak potential with our dc fans, heat sinks, Peltier devices, and thermal accessories.

## **Online Resources** *Keeping Engineers at the Forefront of Product Design*

*From 3D models and PCB footprints to technical papers, calculators, software, blog posts, and more, our diverse library of tools and resources is ready to assist engineers at every stage of their design journey.*
