

# WINDING CAPABILITIES

When searching for your Power & Inductive solution, winding is always a necessary requirement. That is why Fair-Rite is thrilled to have added custom prototype to production winding for our customers. This service is based out of our Wallkill facility. With large scale winding production available out of our Asian facility. Fair-Rite is continually improving both our facilities and can work with our customers to fulfill any winding needs to make sure Fair-Rite Products is and always will be, **Your Signal Solution®**.

With the coordination of our engineering experts to follow you through the process of core selection and now the ability to turn that into a finished component. Our multiple manufacturing locations allow for flexibility to manufacture where it makes the most sense for your application. If a standard ferrite core won't do the trick; Fair-Rite as always, has the ability to custom produce the perfect one for your need.
